About This Game

The game consists of 4 parts: basic skills: 1: For the stand-alone game, you can play tournament games and heads-up 3 games against professional-level AI opponents. The current price is R\$50. In the next version, the nash solver real-time calculation and decision-making function 3 will be integrated in the decision assistant of the game. The price will be raised to R\$100, just to let you 3 experience the value of GTO technology in real-time games. Advanced Features: 2: A complete set of Texas Hold'em calculation tools. 3: Simulator function: 3 It can be used as an online Texas Hold'em game auxiliary tool for real-time calculation of various data and decision-making 3 assistant tools, as well as a post-match review tool, or use the simulator as a hand training device. 4: Hand trainer: 3 In the game, you can freely set your hole cards or a custom range, or set a certain type of 3 player range, so as to train. These tool functions will be removed in one version and placed in another Poker Solver 3 product. The entire new Solver tool product will be priced at R\$100/year, and the assistant inside will be R\$99/month, R\$799/year. The simulator, which 3 integrates the computing power of the new version of Poker Solver, has been making steady money in real money games. 3 The whole set of tools is better for live games than <https://rangeconverter/>. The Poker Assistant assistant version costs R\$5,000. The core 3 functions of the new version of Poker Solver: 1: Solver tool set, with Pio Solver's Nash solver computing ability to solve 3 the Headsup two-person game, and also has the core computing ability of 2~9-person table Icmizer3 multi-player Nash Solver, and cooperates 3 with the poker simulator to complete the real-time Ability to calculate and review. 2: Poker complete set of mathematical calculation tools 3 (Poker Tools). 3: Simulator and Assistant (Assistant), to meet the real-time calculation of the game and decision-making ability, as well as 3 the resumption calculation ability. 4: The existing game function will become a customized practice function (Quiz), and 500 WSOP best hands 3 are customized, and you can only play these specific hands. The version you buy now does not integrate these Solver product 3 functions. This version only meets the AI battle function and specific card and range training functions of the same professional 3 player level. At the same time, other Poker Solver tools do not have the game battle function in the Single player 3 stand-alone game. Different products solve different problems. However, the AI in the Single Player stand-alone game will integrate the Nash Solver 3 computing power when the upgraded version is released, allowing you to experience the effects and functions of the Solver. Although 3 the current version does not have Nash computing, it can basically guarantee 70% of the decisions are correct. up. The new 3 version of Poker Solver will be released in March 2024, and

this Single player stand-alone game will be updated at 3 the same time. This means that until March 2024, buyers can still experience the advanced features in Single player stand-alone games. The 3 removal of these advanced features does not mean that the product is devalued. In the new version of the game, 3 there are 4 advanced strategies for you to configure freely. In the game interface, you can still see the data 3 analysis capabilities displayed by various upgraded advanced tools. The data displayed by these real-time calculations is valuable knowledge. The 4 strategies 3 include: 1: Pio Preflop Chart 2: Push/Fold 3: Nash Equilibrium Solver 4: 10 Groups Range

The table below shows the functional price comparison between the computing tools 3 in the game and other Texas-related computing products on the market. In this game, you can freely organize the table, freely 3 set the blind level, freely set the hand range of each opponent, freely set the opponent's AI type, and freely 3 set your own hand range, so that every time you deal You're dealt cards in this range, and you're free 3 to set one of the 20 good cards for a definite workout. In the game, the complete real-time calculation of each 3 player's various winning rate data on each street, listening to the winning rate, and EV data saves you from the 3 trouble of manual calculation, and will also give you AI decision-making suggestions from professional textbooks. These ensure you can complete 3 on-demand training. and judging whether it makes sense to you. The complete display of these information in the game is also 3 to help you analyze the game, so that you can know the logic of your own winning and losing, where 3 you win and where you lose. There will no longer be any free version on the mobile phone, nor will there 3 be any advertisements, and there will be no advertisements on all versions of the entire platform. New products and new features 3 will be continuously released and updated. In the past two years, I have been researching and practicing the ability of Poker 3 Solver, and will complete the release of new products next year. Extremely powerful solver ability. Regarding the price of the game, 3 it will only become more and more expensive, because I am making more and more money in the game, so 3 why should something of value be cheap. This is the long-term value compounding of self-development. Be careful and make valuable products, 3 which is the original intention and purpose.

manual core function: 1: Click the function board card to set the community card, and click 3 the hole card icon to set the hole card. 2: Different player types can be set, and each player has a 3 different range of actions. These ranges also determine different action logics. 3: Equity calculator, draw equity calculator, EV calculator, real-time poker 3 simulator tool. 4: Real-time poker simulator tool, this is the most important for online professional players, which greatly simplifies the time 3 consumption of thinking and performing calculations. 5: Advisor (advisor) provides you with a standard play, the basic guarantee is not to 3 lose money. 6: Before the action decision, provide the EV value of different actions and bet size. 7: Practice the advisor and action 3 EV in the battle mode.

Core value points: 1: Poker simulator tool: When playing poker online, professional players can display the complete 3 mathematical data immediately after entering the opponent's range in real time according to the situation of the game table, saving 3 users calculation time and energy, and providing standardized behavior suggestions. These real-time and accurate calculation data and standardized action suggestions 3 help players make quick decisions. Value point: It saves the player's energy consumption in mathematical calculations in the game, and allows 3 the player to invest more energy to focus on the accurate determination of the player's playing range and the use 3 of real-time data to make decisions based on experience. Real-time display of all poker game data, which is not available in 3 other tools. I combined the various data calculation functions scattered in multiple Texas poker calculation software into the real game. 3 The player only needs to determine the opponent's range. In the simulator, Preflop and postflop are also purchased professional range action 3 data, which can be set in the simulator: stacks deep, bet size, and player position to see the real-time advisor. 3 Now this advisor is conservative. range data comes from [rangeconverter/solution_formats/eight_max-MTT-Complete-Postflop-Addon-NEWOnlineViewer-yearly](#)

The core of the simulator is that you need to have 3 the ability to judge the opponent's range of action. This is also one of the most basic and most important 3 abilities of playing cards. If you don't have the ability to display the range of Texas Hold'em at all, then you 3 can use this tool to repeatedly play poker to familiarize yourself with the range. In the battle mode I provide 3 the ability to display the range in real time.

Let you clearly see how different people in different ranges play, 3 and those actions are standard textbook play styles for professional players. Real-time display of complete data: The data standard provided comes 3 from the result of 10,000 times Equity calculated by Monte Carlo method. In the battle mode with AI, you need 3 to turn on the observer mode switch (observer) Data in the avatar frame: 1): EV: 0.70BB, indicating the EV data after the 3 current operation. BB stands for the big blind value. 2): equity data for each street: 2r: 4; 12.93%. Format: 2r (to river 3 equity, calculated to river street Equity): rank (in the current surviving players, own 2r Equity ranked); equity (own real-time 2r 3 Equity, 2r Equity calculated from your own perspective). Indicates that the Equity data to River Street is calculated based on 3 the player's own hole cards against other players' range or hole cards. nd: 1; 72.67%. Format: nd (next street equity, your 3 own Equity on the next street): rank (ranked your own nd Equity among the current surviving players); equity (your own 3 real-time nd Equity, nd Equity calculated from your own perspective). Indicates that the nd Equity data to the next street 3 is calculated according to the player's own hole cards against other players' range or hole cards. cp: 1; 88.23%. cp (current 3 street pure equity, the pure Equity of one's current street): rank (ranked of one's own cp Equity among the current 3 surviving players); equity (your own real-time cp Equity, cp Equity calculated from your own perspective). Represents the calculated cp Equity 3 data on the current street based on the player's own hole cards against other players' range or hole cards. Outs: 30, 3 which indicates the number of draws made by players on that street. At this time, you can open the hands 3 card strength information table, and you can see the probability of the current hole cards and board cards developing to 3 various draws on each street. 1: In preflop and river street, showing 2r is enough. 2: On flop, turn street: displays the 3 complete 2r, nd, cp data, and on flop, turn street, you can see the outs data of the player in 3 that street at the same time. These real-time Equities and draw data assist in determining the hole cards against other players' 3 hole cards or ranges, their own hands card strength and winning ability, and help them make action decisions on various 3 streets. The betsize window at the top of the interface shows the human player (self) under the current action menu, the 3 EV value ranking of each action in the action menu, the leftmost is the best, and it decreases from left 3 to right (if there is only the leftmost data, then it is According to EV evaluation, this action is the 3 most appropriate, and other actions do not need to be considered). This is based on the action logic shown by 3 the EV. This is also the EV data of each action calculated by the player himself before the action. (The 3 EV data in the avatar range is the EV data after the action, and the meaning of the two is 3 different). This 4-speed EV table of betsize is the data display for making decisions based on EV when displaying the street. In 3 fact, EV has no absolute correct meaning in action guidance before and after the flop (preflop and postflop), and it 3 is not correct to make decisions based on the positive and negative EV. Advisor (Advisor): Shows the decision in this street, 3 comprehensively assessing the following content: player's hole cards, opponents' range or hole cards, current own 2r, nd, cp Equity data 3 and Equity ranked, and the player's own position Table position, player's current stacks deep, current number of people remaining at 3 the table, EV data of each action in the current menu, and bankroll management. The current advisors tend to be 3 conservative, and the goal is to try not to lose money. Advisor also implements a standardized pre-flop strategy in preflop. Advisor also 3 implemented the post-flop strategy suggested by rangeconverter in postflop. In the battle against AI mode, you need to turn on the 3 advisor mode switch (observer). Click on the user's avatar to open the user's scope, view or set the scope. Click on the 3 hole cards, you can open to view or set the hole cards. Click on the board card, you can open to 3 view or set the board card. In the simulator, click the D icon to switch the position of the dealer. Click the 3 gray D icon to reset the position of the dealer. Regarding range setting or selection: 1: Provides the standard range for various 3 filling actions in the preflop stage. 2: Provide 24 kinds of action ranges commonly used by professional players. Each professional player 3 divides all hole card combinations into 10 action groups. You can see the action ranges of tag, lag, rock, maniac, 3 and nit players. 3: Provides a view of the opponent's mathematical action range based on the opponent's vpip and pfr. Vpip 3 and pfr can view these two values of opponents from third-party statistical software licensed online, such as holdem manager 2. The 3 graphical Equity calculator provides a complete

and correct Equity calculation function. I provide complete toflap, toturn, toriver's montecarlo and Enum calculation 3 methods. It has the same effect as Power-Equilab, and its own data is guaranteed to be correct. When Power-Equilab calculates toflap 3 and toturn, the data is often incorrect (why it is not, you will know by playing with his montecarlo and 3 Enum methods, the longer the calculation, the greater the deviation of the two data, which is wrong), But the calculation 3 result of to river is correct. It sells for R\$40/year. It does not have a real-time calculation method in the game. 3 It is not suitable for actual combat, but only for review calculations, lacking actual combat significance. The provided Equity calculator, draw 3 calculator, and EV calculator are all to ensure that you know the correctness of the data calculation results and allow 3 you to trust the correctness and stability of the function. The AI in the battle mode comes from the range of 3 24 professional players. You can conduct targeted range confrontation strategy training. 1): Various AIs and advisors use the same standard professional 3 gameplay action logic. The difference from yours is only the hole cards and the action range. 2): 14 types of chip 3 depths (10BB~100BB, 200BB) are provided (different medals will open different new chip depths, and different chip depths will have different 3 playing methods). Because of the different chip depths, the card game will be played The strategy is completely different. 3): AI 3 adopts the textbook style of professional players. You can understand the AI's action logic in thousands of matches, you can 3 learn this action logic, and you can also find the corresponding exploiting AI logic. Repeated training can help you quickly 3 identify the opponent's ability and the opponent's range. If it is in Steam, there is no sound. 0: under \Steam\steamapps\common\Solo King-Single Player 3 Texas Holdem Poker\Windows_Release, rename Windows_Release to Windows_Release11: Adjust your computer sound controller. 2: You can download the game from D:\Steam\steamapps\common\Solo King-Single 3 Player Texas Holdem Poker\Windows_Release Move another folder, and then click TexasHoldEmSingle.exe to have sound.

Dra Ann Burgess: Uma Pioneira na Unidade de Ciências Comportamentais do FBI

Dra Ann Burgess, uma pioneira na Unidade de Ciências Comportamentais do FBI, conta como ajudou a desenvolver o manual moderno do FBI para perfilar assassinos 10 euro free bet série.

Uma Carreira no FBI

O documentário Mastermind: Pensar Como Um Assassino 10 euro free bet Serie traça a vida e carreira de Burgess, que ajudou a identificar, rastrear e entrevistar diversos assassinos 10 euro free bet série notórios, incluindo Edmund Kemper ("O Assassino da Co-Ed"), Dennis Rader ("BTK"), Henry Wallace ("O Estrangulador do Taco Bell") e Jon Barry Simonis ("O Assaltante de Máscara de Esqui").

Uma Mulher na Unidade de Ciências Comportamentais do FBI

Burgess também quebrou um teto de vidro na unidade predominantemente masculina do FBI, enquanto criava filhos que pouco sabiam sobre o assunto de seu emprego diário.

De Enfermeira a Perfiladora de Crimes

Inicialmente, Burgess teve uma carreira 10 euro free bet enfermagem e não teve interesse 10 euro free bet crimes até o início dos anos 1970, quando a socióloga Lynda Lytle Holmstrom a procurou para um novo projeto.

Um Programa de Aconselhamento 10 euro free bet Crise Hospitalar

Em 1972, Burgess e Holmstrom co-fundaram um dos primeiros programas de aconselhamento 10 euro free bet crise hospitalar 10 euro free bet Boston City Hospital.

Uma Pesquisadora 10 euro free bet Victimologia

Em 1978, Burgess foi convidada para dar palestras e ensinar agentes do FBI na academia 10 euro free bet Quantico, Virgínia, sobre victimologia e crimes sexuais violentos.

Introduzindo Métodos Científicos no Perfilamento de Assassinos 10 euro free bet Serie

Burgess ajudou a produzir um guia de 57 páginas para entrevistas, que incluía informações sobre a vítima.

Desenvolvendo Perfis de Assassinos 10 euro free bet Serie

Burgess e 10 euro free bet equipe desenvolveram um perfil provável do assassino de dois meninos 10 euro free bet Nebraska 10 euro free bet 1983, o que ajudou a polícia a prendê-lo.

Padrões 10 euro free bet Assassinos 10 euro free bet Serie

Burgess observou que a maioria dos assassinos 10 euro free bet série teve uma experiência inicial traumática na infância e que eles são geralmente muito inteligentes.

Trabalhando com Assassinos 10 euro free bet Serie

Burgess entrevistou cerca de uma dúzia de assassinos 10 euro free bet série condenados e observou que eles podem ser restritivos, charmantes ou desagradáveis.

O Caso Menéndez

O documentário também aborda o caso de Lyle Menéndez e seu irmão Erik, que confessaram ter assassinado seus pais 10 euro free bet 1989.

Uma Testemunha de Defesa

Em 1993, Burgess foi uma testemunha de defesa no primeiro julgamento dos irmãos Menéndez e Erik, encontrando que as alegações de abuso sexual do pai eram válidas e uma "causa original" dos assassinatos.

Continuando a Ensinar e Pesquisar

Atualmente, Burgess continua a ensinar 10 euro free bet Boston College, conduz um estudo sobre mulheres indígenas assassinadas e desaparecidas e vê o potencial da inteligência artificial 10 euro free bet aprimorar o perfilamento criminal.
