The Curacao Gambling Authority is one of the most reputable online gambling regulators in the world. In order for the operator to be able to obtain a licence by the CGA, they have to undergo strict vetting processes and rigorous audits.

These ensure that the operator meets international standards of fairness, security, and responsible gambling. The requirements set by the CGA are designed to protect players from fraud and ensure that the games offered are not rigged in any way.

Operators like BK8, who obtain a licence from the Curacao Gambling Authority, are required to keep players' funds in segregated accounts. This ensures that player funds are protected and cannot be used for operational expenses.

Their technologies operate in real-time to detect and counteract any suspicious activities, ensuring that your account and transactions remain secure. Regarding game transparency, BK8 has secured licences from third-party independent software testing agencies, such as bmm, iTech Labs, and Gaming Laboratories International. After a detailed review, we concluded that BK8's terms and conditions are fair and straightforward for players. Concerning withdrawals, there's room for improvement. While crypto transfers are swift, cashing out via other payment methods, like e-wallets or online bank transfers, can take longer than expected. For any uncertainties, you can always consult with customer support agents, go through T&Cs, or check the FAQs section.

minute. What impressed us the most is that players at BK8 can enjoy professional customer support 24/7, available in over eight different languages. Aside from English, BK8 offers assistance in Vietnamese, Thai, Indonesian, Malay, Chinese, Tagalog, and Cambodian. The site itself is available in these languages, allowing players to navigate comfortably in their native language.

#### Mobile Compatibility

BK8 Casino understands how much we all love using our phones, so they've made sure their site works great on mobile. They even have an official app for both Android and iOS users. For those with Android phones, getting the app is easy. Just go to BK8's website, and you can download the app from there. If you're using an iPhone, the steps are a bit different. First, find the download button for iOS on BK8's site. This will take you to a page for an app called "Dice Dice Dice" on the AppStore. Even though it's not called BK8, download this app. When you open it, the BK8 Casino app will launch. This different approach might come as a result of AppStore regulations.

Nonetheless, hats off to the BK8 team for thinking outside of the box, and offering all of their players the chance to play from the mobile app.

## **Medicamento contra epilepsia pode ajudar a prevenir paradas de respiração bac bo bet7k apneia do sono, segundo pesquisa**

Um medicamento usado para tratar epilepsia pode ajudar a prevenir as paradas temporárias de respiração de pacientes com apneia do sono, de acordo com uma pesquisa.

### **O que é apneia do sono?**

A apneia do sono é um problema de respiração comum que afeta aproximadamente uma pessoa bac bo bet7k 20, de acordo com o Instituto Nacional para Excelência bac bo bet7k Saúde e Cuidados no Reino Unido. Os pacientes geralmente roncam alto, bac bo bet7k respiração começa e para durante a noite e eles podem acordar várias vezes. Isso não apenas causa fadiga, mas também aumenta o risco de pressão alta, acidente vascular cerebral, doença cardíaca e diabetes do tipo 2.

### **Epilepsia medicamento reduz sintomas de apneia do sono**

Uma pesquisa internacional identificou que um medicamento contra epilepsia está associado a uma redução significativa dos sintomas de apneia do sono.

Os achados, apresentados no Congresso Europeu de Sociedade Respiratória bac bo bet7k Viena, Áustria, demonstraram haver possíveis opções para aqueles que não podem usar dispositivos de ajuda à respiração mecânica como máquinas de pressão positiva contínua da via aérea (CPAP).

O prof Jan Hedner, da Sahlgrenska university hospital e da Universidade de Gotemburgo na Suécia, disse: "O tratamento padrão para apneia do sono é dormir com uma máquina que sopra ar através de uma máscara facial para manter as vias aéreas abertas. Infelizmente, muitas pessoas acham essas máquinas difíceis de usar no longo prazo, então há a necessidade de encontrar tratamentos alternativos."

Os pesquisadores conduziram um ensaio clínico randomizado com quase 300 pacientes com apneia do sono obstrutiva na Bélgica, República Tcheca, França, Alemanha e Espanha que não usavam máquinas CPAP. Eles foram divididos em quatro grupos e receberam uma das três forças de sulthiame ou um placebo.

O estudo mediu a respiração, os níveis de oxigênio no sangue, o ritmo cardíaco, os movimentos oculares, bem como a atividade cerebral e muscular enquanto os pacientes dormiam, no início do ensaio, após quatro semanas e após 12 semanas.

Ele encontrou após 12 semanas, os pacientes que tomavam sulthiame tiveram até 50% menos ocorrências de apneia do sono que os que tomavam placebo. A respiração parou e níveis mais altos de oxigênio no sangue durante o sono. Os efeitos foram mais marcantes nas doses mais altas do medicamento.

Hedner disse que os achados sugerem que o sulthiame pode ser um tratamento eficaz para a condição e que um estudo maior é necessário para confirmar os efeitos benéficos respiratórios do medicamento em um grupo maior de pacientes com apneia do sono.

Erika Radford, chefe de conselhos de saúde na Asthma + Lung UK, disse que os achados são um primeiro passo para se afastar do equipamento de respiração usado enquanto dorme para um tratamento baseado em drogas. "Este potencial alternativo ao tratamento atual facilitaria para as pessoas gerenciar a condição", ela acrescentou.

Dr. Sriram Iyer, um consultor de pneumologia e medicina do sono e presidente eleito da seção de medicina do sono da Royal Society of Medicine, disse: "Este é um estudo importante destacando que a terapia medicamentosa para apneia do sono não está muito longe de ser uma realidade."

Embora mais estudos examinem os benefícios a longo prazo, quaisquer efeitos colaterais e se existem tipos específicos de pacientes que se beneficiariam mais do tratamento, é "vitalmente importante não esquecermos que a apneia do sono está, na maioria dos casos, ligada a obesidade e abordar isso deve ser a prioridade", ele disse.
