Multiplier Wild

Meter: The meter to the left of the reels will start to fill with each winning premium symbol combination; the more symbols in a win, the more segments that will be filled up. Once the meter is completely full, at least 1 multiplier wild will be added to the reels at random to give you an enhanced payout opportunity.

Free Spins: The word

'Bonus' will be spelt out on random reels behind the symbols - if you manage to clear all symbols on top of this word then you'll be given the opportunity to choose which free spins bonus you want to play through - all differing in variance levels.

How to

Play Golden Ticket 2

Stake: Once the game has loaded, the first thing you need to do is determine the value of each of your spins - this is the amount of money that will be deducted each time the reels spin. If the default value isn't to your liking then it's easy to increase or decrease according to your budget - you can simply use the plus and/or minus button to toggle through the available bet increments until you find one that works for you.
