## Master Chess

### Share

Master Chess is an online chess game with single and multiplayer options. If you want to play a game of chess, try out this superb online browser version. In this title, you can play three different game modes and test your skills head-to-head with other chess players.

This game may not be endorsed by the chess federation, but the AI opponents are highly skilled. Furthermore, you can play against skilled opponents from around the world in intense online multiplayer games. The following game modes are available:

1on1 same device

1on1 vs. AI opponent

1on1 vs.

Online opponent

These different game modes give you great flexibility. Please note that the AI opponent is quite difficult - if you are expecting a walk in the park then think again! You must work really hard to outsmart this artificial opponent and you may even lose!

Smooth gameplay and intense online action

The best part of this game is undoubtedly the online gameplay. The match-making system is quick and effective - if you want a quick game, you can start a quick match. Master Chess then pairs you with a random player.

Alternatively, you can play chess online in custom matches. You can either create your own game room, or join one of the servers available. This means that you can organise games and tournaments with your friends relatively easy.

We advise

learning the basics of chess before playing online. When playing, the different moves each piece can make is highlighted - so you can't make a wrong move. Each turn is on a timer, however, so you must think fast!
