100/1 Roulette is a virtual roulette game offering a choice of stakes. The game displays a roulette wheel with 105 pockets numbered 1 to 100 and 5 'shapes' and offers multiple bet options: red/black, odds/evens, etc. Bets are placed in increments depending on the chip value selected by the player.

You must place at least £1 in chips on the betting table before selecting BET to start a game.

The Total stake is displayed at all times. Several different bet types are available.

Set your bet

Place chips on the table by selecting the position on the table that represents the bet you wish to place.

Chip values can be changed using the chip panel below the table.

Bets can be placed on numerous positions on the table. For example, to place a split bet, select the position in-between two numbers on the table.

Pressing Repeat Bet will repeat the chip placement from the previous game.

Pressing Clear All Bets or Clear Last Bet will remove any bets placed in error.

Start the game

Select 'BET' to start your game.

The SPACE BAR key on the keyboard can often be used as an alternative for pressing the primary on screen button.

How do you win?

A win is awarded if the ball lands on a number on the wheel which corresponds to any bets placed on the table.

Once the ball has landed, any winnings are paid and the chips are cleared.

The previous results of the roulette wheel spin are displayed above the betting table.

Awards are detailed in the pay table in-game.

Bets and Payouts

Your winnings will be credited to your account immediately.

You will lose your bet amount if you lose the game.

Bet Recovery

Due to the nature of the communications medium for the game, the player may experience interruptions, delays or termination to the game play cycle.

In the event of an unexpected interruption/termination of a real play game, the game will recover to the last known state.

If for example, the game was started but not fully completed due to closure of the browser or connectivity problems, this will not affect the final result of the game after the game has recovered, and any winnings will be correctly paid to your account balance, and will be exactly according to the winning or losing result produced prior to the game being prematurely terminated.

General Information

The player's odds of getting any particular outcome are always the same.

RTP is between 92.86% and 96.19% based on betting strategy.

RTP when placing bets on "Fifteen Number Avenue" has a theoretical RTP of 92.86%. RTP when placing bets on a "Single Number" has a theoretical RTP of 96.19%.

The outcome of any play during the game is pre-determined and player choices do not affect the return of the game.

The RTP reflects the theoretical return across a very large number of plays over an extended period of time, and represents the long-term expected payback of the game which has been calculated by an independent testing company, in accordance with the required regulations.

Malfunction Voids All Pays and Plays.
