There are two distinct types of bet you can make when playing online roulette – inside and outside bets.

What is an inside bet?

In roulette, an inside bet is where you put your chips on individual numbers inside the roulette grid. Because you're focusing on individual numbers, rather than any red number for example, the roulette odds are significantly reduced. However, with the higher risk comes a greater reward, so your payout would be more generous.

Putting your chips on a single number is called a straight-up bet, and this is the most common type of inside bet, paying out at 35:1 in European and American Roulette.

What is an outside bet?

Outside bets are made by placing your bet on options outside of the numbered roulette grid. These bets increase your chances of winning on each spin, but pay out less than an inside bet would.

You

can choose to bet on a grouping of numbers, such as the first 12, second 12, or third 12, or alternatively pick between 1-18 or 19-36. You can also choose to bet on all black or all red numbers, or decide between all odd and all even numbers.

Experiment

with different combinations to suit your preference, and remember you're playing free online roulette, so it's all for fun!
